Subject: Testimonial- (HPV)

I am a firm believer in the positive benefits Ozone Therapy can have on your health! In October 2019, I had a weakened immune system due to my autoimmune disease and my body was having a difficult time fighting and keeping viral infections away. Due to my weakened immune system I picked up the HPV virus on my toes and was diagnosed with having Mosaic Warts.

My Podiatrist stayed that my body is having a difficult time fighting this virus and even using a very strong topical ointment that I would have to apply 3-4 times daily, wouldn't work because the virus is spreading quickly. I will need to have major surgery and it is the best option, although it could take up to 6 months to recover and I can't exercise or put weight on it, because of my Raynaud's Syndrome.

At this point, I heard of Ozone Therapy and decided to try that first for multiple reasons. I started ozone in November 2019 having HPV virus, fatigue, swollen lymph nodes, insomnia, severe joint/muscle pain, and constant viral infections. I consistently went 3x a week and I started feeling the benefits right away! As far as my HPV, I could actually see and feel it disappearing each and everytime I went!

Ozone Therapy truly helped me get my life back! I started feeling like myself again! I was sleeping better, eating better, I had so much more energy, I could breathe again!
